Option 3

The Albion Bell tent has been designed and manufactured in the traditional way using high quality canvas and timber poles.

The tents are made in heavier duty canvas than is used in the modern bell tents, and the canvas is proofed to British Standards for rot inhibition, fire retardancy and water resistance. Every tent has its own unique number so its production and destination can be tracked at any time.

Traditional wooden sliders on natural look ropes (polyester but looks like hemp), wood pegs, classic timber poles, heavy duty PVC groundsheet and 400 gsm canvas all add up to a strong and long lived tent.

- UK manufactured
- Canvas coated with fire retardant, water proofing and rot inhibitors to British Standards
- Fire certificates issued on request.
- Full maintenance and repairs available.
- All products designed and adapted to meet the needs of the European climate.
- Options on construction from self-build to supply full team or supervised self-build.
- Service contracts available.
- Finance available.
