THE ALBION CANVAS STRUCTURE RANGE

The Satara

The Satara has been designed as a small Safari style tent with provision for a wood burning stove.

It is a true pole tent with a separate PVC flysheet and complete canvas inner tent. This means the tent stays warm in the colder weather and cooler in the warm weather. The inner tent is completely protected by the flysheet extending its life and giving you the option for 12 month use.

Available in 3 colours 'sand' as pictured above, off white or olive green, although the standard colours are olive flysheet with sand inner tent. All the canvas is proofed to British and European standards for water resistance rot inhibition and fire retardants.

The frame is traditional redwood sectioned poles tensioned out using simple webbing and cam lock guys and steel marquee stakes, making the whole structure extremely strong and weather resistant. The poles are finished in an exterior grade 2 part environmentally friendly coating for maximum life.

Two rear opening windows and two side opening windows with fly screen are included. These can be supplemented with additional windows, either fixed or opening wherever you wish. The two large double zipped doors can have mesh fly screens fitted or clear windows as optional extras. The front deck extends 2 metres beyond the front doors of the main tent under the extended flysheet.

- Canvas coated with fire retardant, water proofing and rot inhibitors to British Standards
- Fire certificates issued.

Standard layout showing pole positions and windows

Please note: - All images are copyright, and may not be reproduced without consent.

It is the owners' responsibility to ensure suitability of ground conditions for stakes, and the proposed tent position is suitable with regards to prevailing winds and likely storms. If you intend to keep your tents up permanently we recommend fitting wind break cones to the front of the tent. Please contact us for advice if you are in any doubt on any points raised here.

All prices quoted are based on installation on flat, firm ground. In certain circumstances longer guy ropes and stakes may be required, any changes to standard are chargeable and if not included at time of order may incur a delay in installation or additional charges for return visit. Please contact us if in any doubt.
