**Product Details**

**Product Name:** [No 8 Brick lined Box Stove](#)

**Category:** [Wood Burning stoves](#)

**Description:** *The No 8 brick lined box stove is designed for longer term use rather than portability, but is still relatively light compared to a cast iron stove. The brick lining retains the heat and radiates it more evenly. It helps the stove to burn more efficiently and for longer. Come with front air inlet control, internal baffle and set on sturdy legs. Available in the usual variety of colours - black, mojave red, forest green or almond. Takes a standard 100mm diameter flue (chimney). I recomend the use of the stainless steel flue rather than the cheaper black stove enameled with this stove.*

**Weight:** 60 kg

**RRP:** £395.00
